Systems & Control Letters 18 (1992) 491–493
North-Holland

Author Index Volume 18 (1992)

(The issue number is given in front of page numbers)

Aeyels, D., On stabilization by means of the Energy–Casimir method (5) 325–328
Aliev, F.A., B.A. Bordyug and **V.B. Larin,** Discrete generalized algebraic Riccati equations and polynomial matrix factorization (1) 49– 59
Allwright, J.C. and **G.C. Papavasiliou,** On linear programming and robust model-predictive control using impulse-responses (2) 159–164
Anderson, B.D.O., see J. Lam (2) 129–137
Anderson, B.D.O. and **S. Dasgupta,** Connections between real Schur polynomials and half order complex Schur polynomials (3) 237–244

Bai, E.-W., see S. Raman (3) 173–177
Beghelli, S. and **U. Soverini,** Identification of linear relations from noisy data: Geometrical aspects (5) 339–346
Belhouari, A., E. Tissir and **A. Hmamed,** Stability of interval matrix polynomial in continuous and cases discrete (3) 183–189
Berghuis, H., H. Nijmeijer and **P. Löhnberg,** An addendum on "Robust control of robots by the computed torque method" (5) 403–407
Bordyug, B.A., see F.A. Aliev (1) 49– 59
Busvelle, E., see F. Deza (4) 295–299

Cao, Li and **Yu-Fan Zheng,** On minimal compensators for decoupling control (2) 121–128
Carroll, J.C., see D.M. Dawson (3) 217–222
Čelikovský, S., On the global linearization of nonhomogeneous bilinear systems (5) 397–402
Chang, F.R. and **H.C. Chen,** The generalized Cayley–Hamilton theorem for standard pencils (3) 179–182
Chen, H.C., see F.R. Chang (3) 179–182

Dahleh, M.A. and **J.S. Shamma,** Rejection of persistent bounded disturbances: Nonlinear controllers (4) 245–252
Dasgupta, S., see B.D.O. Anderson (3) 237–244
David, J., see B. De Moor (5) 329–337
Davison, E.J., see L. Qiu (1) 9– 22
Dawson, D.M., Z. Qu and **J.C. Carroll,** On the state observation and output feedback problems for nonlinear uncertain dynamic systems (3) 217–222
De Moor, B. and **J. David,** Total linear least squares and the algebraic Riccati equation (5) 329–337
Deza, F., E. Busvelle, J.P. Gauthier and **D. Rakotopara,** High gain estimation for nonlinear systems (4) 295–299

Fan, M.K.H. and **A.L. Tits** A measure of worst-case H^∞ performance and of largest acceptable uncertainty (6) 409–421
Feng, G., M. Palaniswami and **Y. Zhu,** Stability of rate constrained robust pole placement adaptive control systems (2) 99–107
Feng, G. and **M. Palaniswami,** Continuous time indirect adaptive control with disturbance rejection (3) 211–215
Fu, Li-Chen, see Teh-Lu Liao (1) 39– 47

Gauthier, J.P., see F. Deza (4) 295–299
Gessing, R., State estimation for linear systems with observations partially corrupted by noise (2) 139–145
Golub, G., B. Kågström and **P. Van Dooren,** Direct block tridiagonalization of single-input single-output systems (2) 109–120
Gu, G., P.P. Khargonekar and **Y. Li,** Robust convergence of two-stage nonlinear algorithms for identification in $\mathscr{H}_\infty$ (4) 253–263

Hmamed, A., see M. Mrabti (1) 73– 81
Hmamed, A., see A. Belhouari (3) 183–189
Hsu, Chen-Fa, see Teh-Lu Liao (1) 39– 47
Huijberts, H.J.C., H. Nijmeijer and **L.L.M. van der Wegen,** Minimality of dynamic input–output decoupling for nonlinear systems (6) 435–443

Ilchmann, A. and **H. Logemann,** High-gain adaptive stabilization of multivariable linear systems – revisited (5) 355–364
Ionescu, V. and **M. Weiss,** The l^2-control problem for time-varying discrete systems (5) 371–381

Johnson, K.K., see I.W. Sandberg (5) 391–395

Kågström, B., see G. Golub (2) 109–120
